Build Confidence

Archon Engine

88 /100 **Good**

Based on code output, archetype detection, and pipeline success

Build Score Breakdown

FACTOR	POINTS	NOTE
Code Files	28	2 files
Visual Assets	40	5 imagen-backed pngs
Pipeline Success	20	Completed without error

Scoring Methodology: Prompt Quality is measured by IBM Watson NLU — keyword density, domain relevance, and entity extraction from the user's original prompt (scale 0–100). Build Confidence is computed by Archon's governance engine from pipeline outputs — files generated, archetype detection success, and pipeline completion status.

Brief

This project aims to create an aesthetically pleasing fan page dedicated to Final Fantasy 7, featuring characters Cloud, Barret, and Tifa. The website will utilize AI-generated images to closely represent the characters and will include elements such as weapons and a game map, with a blurred background of Midgar to enhance the visual appeal.

Goals

- Create a visually appealing fan page that captures the essence of Final Fantasy 7.
- Incorporate AI-generated images of characters Cloud, Barret, and Tifa.
- Showcase weapons and a game map relevant to Final Fantasy 7.
- Ensure the background features a blurred image of Midgar for aesthetic enhancement.
- Provide a user-friendly interface for fans to explore content.

Core Features

- Homepage featuring AI-generated images of Cloud, Barret, and Tifa.

- Gallery section showcasing weapons from the game.
- Interactive game map of Final Fantasy 7.
- Blurred background image of Midgar.
- Responsive design for accessibility on various devices.

Build Plan

Milestone 1: Project Setup & Initial Design

PLAN-1	Define project scope, confirm technical stack, and gather initial design inspirations.
FE-1	Set up the base project structure including HTML, CSS, and JavaScript files, and configure development environment.
BE-1	Source and prepare high-quality AI-generated images for Cloud, Barret, Tifa, weapons, and the Midgar background.
FE-2	Implement global CSS styles, typography, and integrate the blurred Midgar background image as the site's aesthetic foundation.

Milestone 2: Core Fan Page Development

FE-BUILD-1	Build the complete Final Fantasy 7 Fan Page Website as a single self-contained HTML file, incorporating the hero section, character showcase, weapon gallery, and interactive map placeholder.
FE-3	Develop the homepage hero section, integrating AI-generated images of Cloud, Barret, and Tifa with appropriate styling.
FE-4	Implement the weapons gallery section, displaying at least 5 different weapons with their respective AI-generated images.
FE-5	Integrate an interactive game map, allowing users to click on different locations and view basic information.
FE-6	Ensure the core layout and content are responsive across various screen sizes and devices.

Milestone 3: Content Refinement & Interactivity

FE-7	Refine the interactive game map, adding more detailed location data and enhancing user interaction.
FE-8	Add basic navigation elements (e.g., header links) to allow users to easily move between the homepage, gallery, and map sections.
FE-9	Implement hover effects and subtle animations for character images and weapon gallery items to enhance visual appeal.

Milestone 4: Testing & Optimization

QA-1	Conduct comprehensive cross-browser and device compatibility testing to ensure consistent user experience.
QA-2	Optimize all images and code for faster page load times and improved overall website performance.
QA-3	Review all content for accuracy, visual consistency, and adherence to Final Fantasy 7 theme.
FE-10	Implement basic accessibility features (e.g., alt text for images, keyboard navigation) to improve usability for all users.

Milestone 5: Deployment & Documentation

DEVOPS-1	Prepare the hosting environment and configure domain settings for the fan page website.
DOC-1	Create comprehensive project documentation, including setup instructions, content update guidelines, and troubleshooting.
DEVOPS-2	Perform final deployment of the website to the production environment and verify all functionalities post-deployment.
